2. The following is an examiner's statement of reasons for allowance.

Regarding claim 10, the prior art does not teach or reasonably suggest when allocating functionality to the processor elements, such that data is scheduled to be transferred during a first time slot from a first processor element in a first row to a second processor element in a second row, which is different from the first row, via one of said switches without using any vertical bus, reserving said time slot for said scheduled data transfer on a segment of a vertical bus that would be used in the even of a reallocation of functionality following a determination that either said first processor element or said second processor element was faulty.

Regarding claim 14, the prior art does not teach or reasonably suggest wherein, when allocating functionality to the processor elements, such that data is scheduled to be transferred during a first time slot from a first processor element in a first row to a second processor element in a second row, which is different from the first row, via one of said switches without using any vertical bus, the processor array is adapted to reserve said time slot for said scheduled data transfer on a segment of a vertical bus that would be used in the even of a reallocation of functionality following a determination that either said first processor element or said second processor element was faulty.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
